Kicking Off the
Fall 2024
Semester!

SBT
Events

Hello Institutional,

With the Fall 2024 semester off to a fantastic start, the [School of Business and Technology \(SBT\)](#) would like to invite our community to explore our latest academic magazine, [The Innovator..](#)

Inside, you'll find a plethora of insightful articles, groundbreaking research, and inspiring messages from esteemed faculty and students. This issue showcases innovative programs that are redefining the boundaries of business and technology, as well as profiles of exceptional student leaders who are making significant impacts on and off campus.

We are particularly excited to feature a comprehensive review from SBT Dean, [Dr. Rohan Thompson](#), whose successful achievement of reaffirming the business department's accreditation is garnering attention. Additionally, the magazine includes a special segment dedicated to the [MBA](#) global trip, highlighting the enhanced learning experiences of our postgraduate students.

We hope you enjoy our [4th issue](#) and find it both informative and motivational. As always, we value your support and encourage you to contribute your own stories and research to future issues. Here's to a semester brimming with discovery, growth, and success!

Important Dates

Aug
26 **Fall 2024 Undergraduate Courses Begin**
Last day to add/drop a course is Friday, 8/30.

Sept
10 **Resume & LinkedIn Panel Discussion**
SBT's Professional Development Week begins.

Sept
11 **Live Mock Interview & Headshots**
HT students are invited to attend.

Highlights

Student Internship at EY

"My summer at EY as an Audit and Tax Launch Intern was an incredible experience! I spent three weeks each on two teams, working on internal adjustments and participating in discussions that brought my classroom knowledge to life.

In my Audit rotation, I updated financial statements similar to the case studies in my accounting classes. In my Real Estate Tax rotation, I gained insights into tax compliance and REIT testing while revising various documents. By the end of my six weeks, I had deepened my knowledge and understanding of many accounting concepts and how they apply in the real world.

Overall, I learned a lot, had a great time, and am grateful for the valuable experience that will undoubtedly benefit my career."

Iman Raji

BBA, 2026

ASABE Robotics

Competition

The [ASABE Robotics Student Design Competition](#) is an event where students can enhance their skills in robotic systems, electronics, and sensing technologies by creating a fully autonomous robot for an agricultural task. This year, [Torc Robotics](#) sponsored a group of [Huston-Tillotson](#) computer science students.

A committed team of four students invested months in constructing an autonomous robot designed to tend to strawberry plants autonomously.

Beginning with rigorous preliminary rounds, the competition wrapped the next day in the final round. Despite not securing a placement, our students showed resilience, actively observing and assimilating knowledge from the successful finalists.
